SENIOR SOFTWARE ENGINEER

Senior Software Engineer with 8+ years of experience, specializing in Full Stack Development and DevOps, with deep expertise in C#, Node.js, React, and TypeScript. Proficient in frontend development, modernization, and delivering scalable solutions through strategic refactoring, rigorous testing, and robust DevOps practices. Recognized for proactive problem-solving, collaborative leadership, and delivering high-quality, maintainable code.

KEY COMPETENCIES AND SKILLS

- **General:** Software Development
- **Frontend Development:** Next.js, ReactJs, TypeScript, Vite, Tailwind, Micro Frontends, PWA
- **Backend Development:** C#, NodeJs, NestJs, .NET Core, API Services, SQL, MongoDB, Microservices
- **DevOps & Cloud:** Docker, AWS, Google Cloud, Azure, CI/CD, Azure DevOps, Kubernetes
- **Methodologies:** Agile Methodologies, Scrum Kanban, TDD, JIRA
- **Tools & Version Control:** Git, GitHub, Bitbucket
- **Architecture & Leadership:** Software Architecture System, Design Patterns, Architecting Systems, Engineering Team Management, Recruiting, Performance Management, Communication Project/ Product Management, Innovation, Problem-Solving Skills

PROFESSIONAL EXPERIENCE

KPMG May 2023 - Present

Senior Software Engineer

Directed a high-performing team of 8 engineers in designing and developing scalable software solutions elevating user experience and aligning with modern software development practices.

- Architected and designed software systems using Node.js, React.js, and C#, incorporating design patterns to enhance reliability, scalability, and long-term maintainability.
- Managed the end-to-end cloud migration of client solutions to Microsoft Azure, ensuring seamless deployment and robust CI/CD integration in a DevOps environment.
- Established comprehensive engineering practices across the software development lifecycle, including coding standards, code reviews, testing strategies, and live site operations to improve product quality.
- Collaborated closely with product, program management, and cross-functional teams to plan and deliver product implementations while effectively communicating technical concepts to non-technical stakeholders.
- Conducted detailed code reviews aimed at enhancing product durability and reducing technical debt, proactively leaving the codebase in a better state.
- Demonstrated strong project management and technical writing skills by documenting processes and streamlining communication between technical teams and senior leadership.

SIGNTECH PAPERLESS SOLUTIONS Apr 2019 - May 2023

Software Engineer

Engineered digital transformation projects with a focus on optimizing user experience and backend performance.

- Applied deep technical expertise in software development methodologies and modern frameworks like Next.js and React.js, while utilizing tools such as Git and JIRA to manage project workflows.
- Provided technical oversight, guidance, and support to team members through code reviews and architectural discussions, ensuring adherence to best practices and high coding standards.
- Developed two automated paperless transformation solutions that enhanced business workflow efficiency and precision, reducing manual intervention by 90%.
- Integrated the Stripe Payment Gateway into a digital transformation project, leveraging AWS services to streamline payment processes and ensure secure transactions.
- Managed the development and maintenance of cloud-based software solutions, aligning them with company goals and complex technical requirements.
- Strengthened cross-functional collaboration by effectively communicating technical concepts to stakeholders, resulting in a 20% increase in customer retention and satisfaction after redesigning the SignTech Paperless Apps.
- Enhanced user interface design by incorporating modern styling practices such as Tailwind, contributing to an improved overall user experience.

SMILES INNOVATIONS Sep 2017 - Mar 2019

Web Developer

Built seamless software solutions, ensuring high performance and user satisfaction.

- Developed a web application to ensure the accuracy and reliability of client addresses. Delivered a seamless user experience by integrating CodeIgniter for the backend and AngularJS for the frontend.

- Collaborated with the Product Manager to identify, prioritize, and implement new features, ensuring alignment with project goals and enhancing overall product functionality.
- Conducted code reviews to enhance quality and minimize technical debt.

EDUCATION AND CERTIFICATIONS

University of Lagos

Feb 2018 - Mar 2019

Master of Science, Biomedical Engineering

- **GPA:** 4.62/5.00
- **Achievements:** Distinction

University of Ibadan

Jan 2010 - Mar 2015

Bachelor of Science, Electrical and Electronics Engineering

- **Achievements:** Second Class Upper

CERTIFICATION

- **Azure Solutions Expert (AZ305):** Microsoft Azure (Jul 2025)
- **Azure Administrator Associate (AZ104):** Microsoft Azure (Jul 2025)
- **Professional cloud Architect:** Google Cloud (Sep 2024)
- **Azure DevOps Engineer (AZ400):** Microsoft Azure (Jun 2024)
- **Azure Developer Associate (AZ204):** Microsoft Azure (Feb 2024)
- **ALX-T Full Stack Developer:** Udacity (Sep 2022)
- **Cloud Practitioner:** AWS (Nov 2021)
- **HTML, CSS, JavaScript:** Microsoft Certification (Feb 2017)
